Retake Roma for a Solidary Community Project

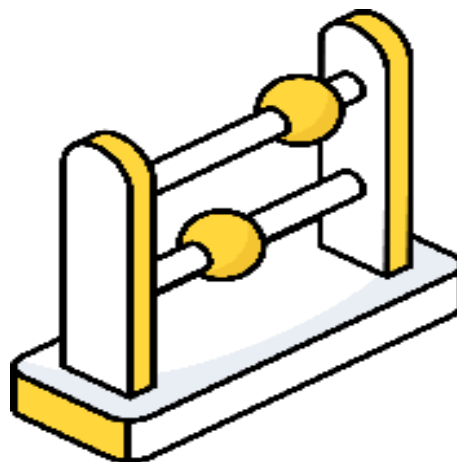

**Retake was founded in Rome 16
years ago**

**With the aim at achieving the
following goals**

**Urban and
social
regeneration**

**Civic
Education**

**Inter –
Institutional
networks'
development**

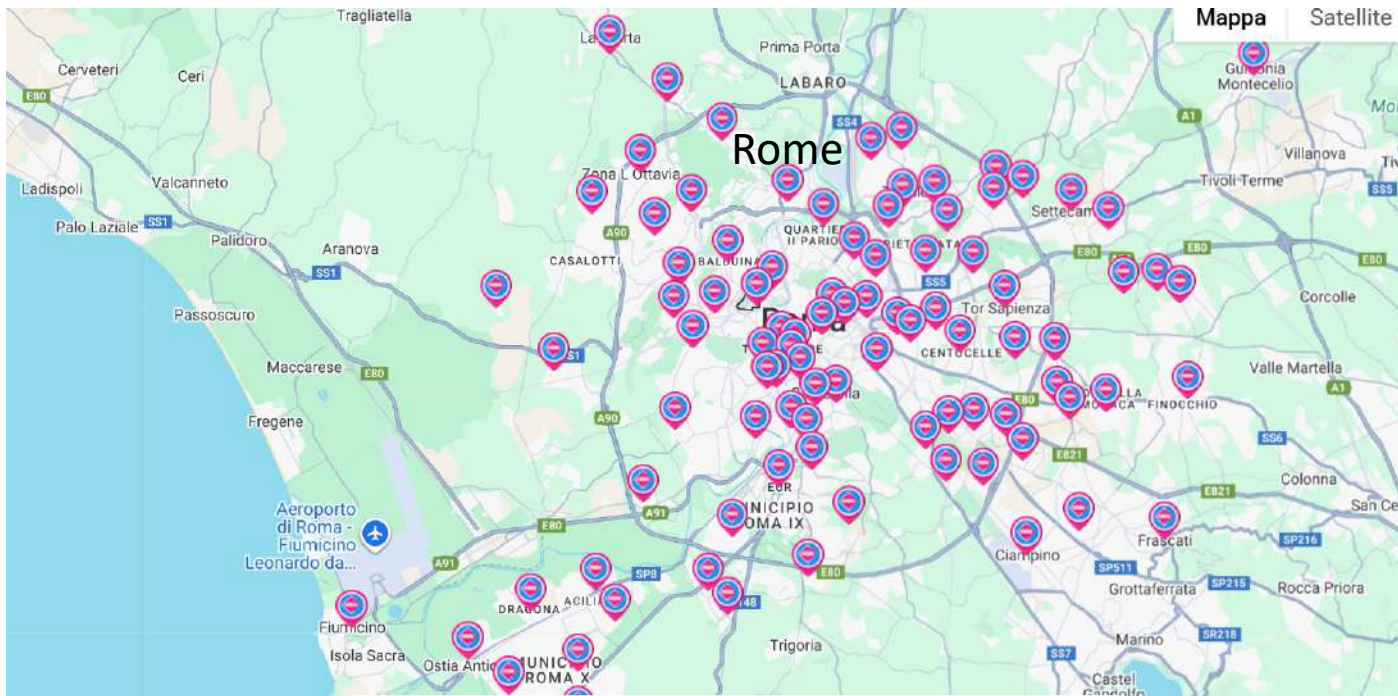

Retake Roma is a **non-profit organization committed to protecting the environment and taking care of the common goods, promoting beauty, livability and urban regeneration**

It is composed by about 160 members with voting rights in the assembly and more than 5.000 simple volunteers

Retake Rome operates both at the territorial level (almost 90 neighborhoods groups)

and through **cross-cutting Projects** that involve multiple areas.

One of these Projects is

Retake Rome for a Solidary Community
which, together with **Retake Schools**,
Retake Culture and **Retake Companies**
mobilizes volunteers and resources in a
highly significant way

**Thanks to a specific web App
(implemented some years ago)
we are able to measure precisely
the results of our activity as a whole**

Some outputs generated by Retake activities in the Roma city
in the last 12 months (rounded data)

**But the real results
can't be measured
by the standard metrics**

The actual results are

- **A new perception of the importance of the active citizenship**
- **A new consciousness to be part of a Community**

of a Solidarity-based Community

The Retake Roma for a Solidary Community Project

The Retake Roma for a Solidary Community Project

has further made explicit the inter-connection already implicit in Retake's objectives:

**urban regeneration accompanied by
human regeneration**

They are two sides of the same coin

This reflects the **awareness** that the most important common good Retake cares for is...
the community itself

Another key added value of the Solidary Project is represented by the **creation of local Networks of Institutions and other associations** that operate towards the common goals of social inclusion through taking care of the urban environment

The approach followed in recent years is a **systemic approach**

whereby the initiatives are multidimensional thanks to the interaction between the various transversal Retake projects and in synergy with the Network's subjects

An example is the interaction between the solidarity project, the schools project and the culture project

the interaction among poor people and immigrants with students is promoted not only during the care activities but even in brainstorming meetings

...and through cultural activities (concerts, visits to historical sites etc.) during or at the end of common goods' care activities

In the case of **The Retake Solydary Project** we can show not only the output measures like the previous ones...

in addition we have the possibility to present some significant outcome numbers like:

people participating in professional training courses with a final certificate: About 80

Internships and work grants with municipal subsidy: More than 50

People that found a job: 24

Therefore we have really succeeded in promoting social and work inclusion through training courses
